2 Annexures

2.1 Annexure 1: Plan Document

The Approved BC Plan is available under Document Repository -> Internal Modules History -> BCP Tab

2.2 Annexure 2: Maturity of Exercising and Testing Program

Performing different tests assists in increasing the overall maturity of the Exercising and Testing program and overall organizational readiness to deal with a business disruption.

Guiding Principles	Low	Medium	High
--------------------	-----	--------	------

Complexity	• Testing is predominantly focused on employee safety. • Advance notice has been sent to the participants before testing is actually conducted. • Exercise are conducted with a simple outage scenario. • It is more of a basic version of problem solving exercise using techniques like brainstorming etc	• Testing to be focused on business recovery as well as employee safety. • Testing conducted on short notice. • Medium impact scenario to be considered for the exercise. • Assess the resource allocation and the adequacy of current procedures and policies.	• Combined levels (business recovery, employee safety etc.) to be conducted. • Surprise test conducted. • Complex scenarios to be involved in the testing • Evaluates the operational capability of the system in an interactive manner.
Integration	• Standalone exercises are conducted (only one method of test is utilized) • Cross functional teams are not tested	• At least 2 types of test methods are utilized • Multi-disciplinary teams are involved in the exercise	• Tests involve all three types of test methods • Top Management participation in the tests including representation from different teams
Scalability	• MBCO requirements are partly tested • Test conducted for a duration of 2 hours or less • Test conducted for a partial facility/facility level outage.	• MBCO requirements are completely tested • Test conducted for a duration 4 to 8 hours • Test conducted for a location level outage.	• Testing of step up or ramp up recovery resources to achieve levels beyond MBCO (as applicable) • Test conducted for a duration of greater than 8 hours • Test conducted for a country level outage.
Frequency	• Tests are not performed as per the approved requirements	• Tests are performed timely, however approved test methods are not exercised	• Tests are performed as per approved test methods and in a timely manner
